

Ring Sizes

The below templates and information will help to measure your ring size.

I am happy to send a ring sizer free of charge before ordering.

Please take into account when measuring the size for a thinner or thicker band as a thicker band will need a slightly larger ring.

Either Use a piece of string to take the circumference of the finger. Then mark where the string meets and measure against a ruler. Now use our ring size chart below to find your size.

Or Take an existing ring you wear. Measure the diameter of the ring and cross reference the measurement with our ring size chart below.
